

### **Testimonial for Suhr Risk Services of California**

Suhr Risk Services has been invaluable in guiding a relatively inexperienced benefits administrator like myself through some of the more complicated and often confusing details of managed health care. Their representatives have often had timely and helpful advice, and seem to understand not only the direction of the health care industry but also, and more importantly, how it directly impacts our company's employees.

I believe Suhr is committed to delivering a high quality of service and the company has served us well for over three years. Their trained agents handle both our health benefits and a number of our company insurance policies.

We would recommend them to any other company looking for a committed and knowledgeable partner.
